

Some expenses require itemizations to separate "child" Expense Types from the "parent." This is primarily used for "Lodging" expenses as they contain nightly charges for the lodging rate, taxes, and fees. However, the itemization process is also used when the expense includes personal portions or when multiple Expense Types apply to a single charge.

For example, the business + personal airfare is purchased on the agency card, but the businessonly itinerary is lower in cost. The user creates an expense for the full amount and itemizes the expense, creating two itemizations: one for the business-only airfare cost and one for the additional personal cost.

Lodging

Concur prompts the user to itemize Expense Type "Lodging." If not itemized, an Exception alert bars the user from Report submission.

1. Add the "Lodging" expense and enter the Check-in and Check-out Dates

- 2. Open the Itemizations taba. The check-in and check-out dates auto-populate from the dates entered in the Details tab (

3. Concur calculates and displays any remaining amount unaccounted for in the itemizations

Note: If Concur resets the lodging rate itemizations to the same transaction date after adding additional itemizations, try adding the additional itemizations before creating the room rate and tax itemizations.

4. "Child" expenses are listed in the "parent" expense and the Expense is marked as "Itemized" in the full list

Note: Transaction Date, Amount, Expense Type, and additional information are adjustable on the individual itemizations even on agency and travel card charges.
